

Googolplex Written Out

Wolfgang H. Nitsche

A stylized graphic of a vinyl record. The text "volume 1000" is written in a bold, black, sans-serif font at the top. The number "10" is written in a large, black, sans-serif font in the center of the record. The record itself is represented by two concentric circles of small, black, rounded rectangular shapes, resembling grooves or data points, arranged in a spiral pattern. The overall design is minimalist and modern.

Googolplex Written Out

Wolfgang H. Nitsche

Stanford University

volume 1000

1096

Foreword

In 1940, the mathematician Edward Kasner published the book "Mathematics and the Imagination", in which he popularized the words googol and googolplex which his nephew suggested as names for big numbers.

The number googol has been defined as 1 followed by a hundred zeros:

[illegible]

The much larger number googolplex has been defined as 1 followed by a googol zeros. While this number can easily be written as

$$\text{googolplex} = 10^{\text{googol}} = 10^{(10^{100})}$$

using the exponential notation, it has often been claimed that the number googolplex is so large that it can never be written out in full.
