

Googolplex Written Out

Wolfgang H. Nitsche

A stylized graphic of a vinyl record. The record is black with a white center. The text "volume 1000" is written in a white, sans-serif font across the center. The record is surrounded by a thick black border. The entire graphic is set against a black background.

Googolplex Written Out

Wolfgang H. Nitsche

Stanford University

A stylized graphic of a vinyl record. The text "volume 1000" is written in a bold, black, sans-serif font at the top. The number "1058" is written in a similar font in the center of the record. The record itself is represented by a series of concentric circles made of small, black-outlined circles, creating a spiral effect. The background is white.

Foreword

In 1940, the mathematician Edward Kasner published the book "Mathematics and the Imagination", in which he popularized the words googol and googolplex which his nephew suggested as names for big numbers.

The number googol has been defined as 1 followed by a hundred zeros:

[illegible]

The much larger number googolplex has been defined as 1 followed by a googol zeros. While this number can easily be written as

$$\text{googolplex} = 10^{\text{googol}} = 10^{(10^{100})}$$

using the exponential notation, it has often been claimed that the number googolplex is so large that it can never be written out in full.

[illegible]
