Googolplex Written Out

Wolfgang H. Nitsche

Stanford University

A stylized graphic featuring concentric circles composed of binary code (0s and 1s). The word "volume" is written at the top left, followed by a long sequence of zeros. In the center, the number "2149" is displayed.

In 1940, the mathematician Edward Kasner published the book "Mathematics and the Imagination", in which he popularized the words googol and googolplex which his nephew suggested as names for big numbers.

[illegible]
$$\text{googolplex} = 10^{\text{googol}} = 10^{(10^{100})}$$
