Googolplex Written Out

Wolfgang H. Nitsche

Stanford University

A large, stylized number 46924 composed of many small, rounded, pill-shaped segments, resembling a spiral or a large letter 'A'. The segments are arranged in a circular pattern, with the number 46924 written in the center. The overall shape is a large, rounded 'A' or a spiral. The segments are black and white, with the number 46924 being black and the background being white. The segments are arranged in a circular pattern, with the number 46924 written in the center. The overall shape is a large, rounded 'A' or a spiral. The segments are black and white, with the number 46924 being black and the background being white.

Foreword

In 1940, the mathematician Edward Kasner published the book "Mathematics and the Imagination", in which he popularized the words googol and googolplex which his nephew suggested as names for big numbers.

The number googol has been defined as 1 followed by a hundred zeros:

[illegible]

The much larger number googolplex has been defined as 1 followed by a googol zeros. While this number can easily be written as

$$\text{googolplex} = 10^{\text{googol}} = 10^{(10^{100})}$$

using the exponential notation, it has often been claimed that the number googolplex is so large that it can never be written out in full.

[illegible]
