

Googolplex Written Out

Wolfgang H. Nitsche

A circular progress indicator with a volume icon and a '100%' label. The volume icon is a speaker with sound waves, and the '100%' label is in a bold, sans-serif font. The progress bar is a thick, dark gray arc that fills the circle, indicating 100% completion. The text 'volume' is in a smaller, bold, sans-serif font, and the text '100%' is in a larger, bold, sans-serif font. The entire graphic is in black and white.

Googolplex Written Out

Wolfgang H. Nitsche

Stanford University

[illegible]

Foreword

In 1940, the mathematician Edward Kasner published the book "Mathematics and the Imagination", in which he popularized the words googol and googolplex which his nephew suggested as names for big numbers.

The number googol has been defined as 1 followed by a hundred zeros:

[illegible]

The much larger number googolplex has been defined as 1 followed by a googol zeros. While this number can easily be written as

$$\text{googolplex} = 10^{\text{googol}} = 10^{(10^{100})}$$

using the exponential notation, it has often been claimed that the number googolplex is so large that it can never be written out in full.
