

Googolplex Written Out

Wolfgang H. Nitsche

A circular progress indicator consisting of a ring made of small rectangular segments. Approximately 68% of the segments are filled with black, while the remaining 32% are white. The number "68" is printed in a bold, sans-serif font at the top-left position of the circle.

Googolplex Written Out

Wolfgang H. Nitsche

Stanford University

Foreword

In 1940, the mathematician Edward Kasner published the book "Mathematics and the Imagination", in which he popularized the words googol and googolplex which his nephew suggested as names for big numbers.

The number googol has been defined as 1 followed by a hundred zeros:

[illegible]

The much larger number googolplex has been defined as 1 followed by a googol zeros. While this number can easily be written as

$$\text{googolplex} = 10^{\text{googol}} = 10^{(10^{100})}$$

using the exponential notation, it has often been claimed that the number googolplex is so large that it can never be written out in full.

[illegible]
