Googolplex Written Out

Wolfgang H. Nitsche

Stanford University

A large, stylized number 6 composed of many smaller 6s, with a 486 inside it. The number 6 is formed by a thick, black, curved line that is slightly irregular, giving it a hand-drawn or digital-art feel. Inside the curve of the 6, the number 486 is written in a smaller, black, sans-serif font. The overall image is a simple, minimalist graphic.

Foreword

In 1940, the mathematician Edward Kasner published the book "Mathematics and the Imagination", in which he popularized the words googol and googolplex which his nephew suggested as names for big numbers.

The number googol has been defined as 1 followed by a hundred zeros:

[illegible]

The much larger number googolplex has been defined as 1 followed by a googol zeros. While this number can easily be written as

$$\text{googolplex} = 10^{\text{googol}} = 10^{(10^{100})}$$

using the exponential notation, it has often been claimed that the number googolplex is so large that it can never be written out in full.
