

Googolplex Written Out

Wolfgang H. Nitsche

A graphic featuring a spiral shape formed by the digits 9 and 6. The spiral starts from the center and winds outwards in a clockwise direction. The word "volume" is written in a bold, black, sans-serif font at the top left of the image. The digits are arranged in a way that creates a continuous, flowing line as they spiral outwards.

Googolplex Written Out

Wolfgang H. Nitsche

Stanford University

[illegible]

In 1940, the mathematician Edward Kasner published the book "Mathematics and the Imagination", in which he popularized the words googol and googolplex which his nephew suggested as names for big numbers.

$\text{googol} = 10^{100}$

$$\text{googolplex} = 10^{\text{googol}} = 10^{(10^{100})}$$

However in this "Googolplex Written Out" multivolume set of books, I am doing just that. It consists of 10000000000000000000000000000
00
00000 volumes, and each volume contains 1000000 zeros of the number googolplex. The first volume also contains the initial digit one with which googolplex starts.
