

Googolplex Written Out

Wolfgang H. Nitsche

A graphic featuring a spiral pattern of the digits 9 and 6. The spiral begins at the top left with the word "volume" in a bold, black, sans-serif font, followed by a long string of 18 "9"s. From this point, the digits 9 and 6 are arranged in a continuous spiral that winds inward, creating a sense of depth and movement. The digits are bold and black, set against a plain white background. The spiral ends in the center with a small cluster of digits including "9", "8", "6", "5", and "9".

Foreword

In 1940, the mathematician Edward Kasner published the book "Mathematics and the Imagination", in which he popularized the words googol and googolplex which his nephew suggested as names for big numbers.

The number googol has been defined as 1 followed by a hundred zeros:

[illegible]

The much larger number googolplex has been defined as 1 followed by a googol zeros. While this number can easily be written as

$$\text{googolplex} = 10^{\text{googol}} = 10^{(10^{100})}$$

using the exponential notation, it has often been claimed that the number googolplex is so large that it can never be written out in full.

[illegible]
