

Googolplex Written Out

Wolfgang H. Nitsche

A graphic featuring a spiral pattern of the characters '9' and '6' arranged in concentric circles. The word 'volume' is positioned at the top left of the spiral. The spiral starts from the center and expands outwards, with the characters '9' and '6' alternating in a repeating sequence. The overall shape is roughly circular, with the spiral ending near the top right.

Googolplex Written Out

Wolfgang H. Nitsche

Stanford University

Foreword

In 1940, the mathematician Edward Kasner published the book "Mathematics and the Imagination", in which he popularized the words googol and googolplex which his nephew suggested as names for big numbers.

The number googol has been defined as 1 followed by a hundred zeros:

[illegible]

The much larger number googolplex has been defined as 1 followed by a googol zeros. While this number can easily be written as

$$\text{googolplex} = 10^{\text{googol}} = 10^{(10^{100})}$$

using the exponential notation, it has often been claimed that the number googolplex is so large that it can never be written out in full.
