Googolplex Written Out

Wolfgang H. Nitsche

Stanford University

A black and white illustration featuring a large, dense spiral composed of many small, stylized human-like figures. The figures are arranged in concentric, slightly offset rings, creating a sense of depth and movement. At the top left, the text "volume 1000000" is written in a bold, sans-serif font. In the center of the spiral, the number "107" is written in a similar font, oriented vertically. The overall composition is minimalist and graphic.

Foreword

In 1940, the mathematician Edward Kasner published the book "Mathematics and the Imagination", in which he popularized the words googol and googolplex which his nephew suggested as names for big numbers.

The number googol has been defined as 1 followed by a hundred zeros:

[illegible]

The much larger number googolplex has been defined as 1 followed by a googol zeros. While this number can easily be written as

$$\text{googolplex} = 10^{\text{googol}} = 10^{(10^{100})}$$

using the exponential notation, it has often been claimed that the number googolplex is so large that it can never be written out in full.

[illegible]
