

Googolplex Written Out

Wolfgang H. Nitsche

A large, thick black spiral composed of the digit '0' starts from the center and expands outwards in a clockwise direction. The spiral is composed of many concentric rings of the digit. In the center of the spiral, the numbers '483' are written in a bold, black, sans-serif font. At the top left of the image, the text 'volume 1000' is written in the same bold, black, sans-serif font.

Googolplex Written Out

Wolfgang H. Nitsche

Stanford University

Foreword

In 1940, the mathematician Edward Kasner published the book "Mathematics and the Imagination", in which he popularized the words googol and googolplex which his nephew suggested as names for big numbers.

The number googol has been defined as 1 followed by a hundred zeros:

[illegible]

The much larger number googolplex has been defined as 1 followed by a googol zeros. While this number can easily be written as

$$\text{googolplex} = 10^{\text{googol}} = 10^{(10^{100})}$$

using the exponential notation, it has often been claimed that the number googolplex is so large that it can never be written out in full.

[illegible]
